Your partner for contract manufacturing

MECHANICAL ENGINEERING AND PROCESS SKILLS, EXPERT TEAMS WITH DECADES OF KNOW-HOW, STATE-OF-THE-ART AND EXTREMELY WELL-EQUIPPED PRODUCTION FACILITIES—YOU CAN MAKE USE OF ALL OF THIS.

CONTRACT MANUFACTURING—OUR RANGE OF SERVICES

As an engineering specialist, Manz has more than 30 years of experience in planning, designing, and building customized and standard machines as well as manufacturing parts for a variety of industries.

If you are looking for an expert and out-sourcing partner for a strong and co-operative collaboration, Manz is the right choice ...

... for Mechanical and Systems Engineering

We can carry out all of your jobs or sub-steps throughout the entire supplier and value chain to bringing equipment into operation.

... for Assembly and Clean Room Assembly Work

We can carry out all of your assembly jobs in Germany, eastern Europe, or Asia at short notice. Our low-cost locations in eastern Europe and Asia operate in accordance with our high German standards of quality and are certified pursuant to ISO 9001:2008.

... for Parts Manufacturing

Welding, CNC production of large and small parts, finishing, plastics processing and welding. We work on state-of-the-art equipment from renowned German manufacturers at our eastern European locations—and, as a result, we deliver high-quality at an affordable price.

OUR EXPERTISE—YOUR BENEFITS

Cutting Costs and the Shortest Time to Market

Thanks to lean manufacturing processes and a tightly knit network of production facilities in Germany, Italy, eastern Europe, and Asia, we can significantly cut your purchase costs and delivery times.

Collaboration Across Locations

Thanks to the collaboration of our global subsidiaries across different locations, we can offer you a customized solution at an affordable price.

A Global Presence and Local Support

The work we carry out on your behalf does not end at our locations, but rather at your local facility or that of your customer.

Our service organization is there to support you during installation, when bringing equipment into operation, when training employees, and with a complete service package if desired.

High Quality

Our specialists guarantee high quality across all steps of the production process—from professional planning to your final product.
